

MILDMATE

Custom Bedding Potential Market Opportunity Report

Engineering-led growth across
hard-to-fit, high-purchase-power
sleep environments.

A4 PRINT EDITION

Prepared for MildMate

1 July 2026

Beds standard brands cannot fit

A visual market map for product,
channel and investment decisions

V-berth

Cut corner

Rounded

Split set

CORE POSITION

Custom-fit bedding and protection
systems for beds that standard
brands cannot fit.

PRIORITY SEQUENCE

Marine - RV - Adjustable - Pet
Glamping - Homecare

The strategic conclusion

MildMate should own engineered bedding and protection systems for non-standard sleep environments - not compete as a general linen brand.

CORE POSITION

Custom-fit bedding for beds that standard brands cannot fit. The moat is the complete system: measurement, pattern engineering, fabric choice, TPU protection, made-to-order production and repeatable reordering.

Best near-term expansion

RV/campervan, adjustable beds and premium pet-owner bedding.

Best B2B growth

Yacht refit, glamping/unique stays, premium homecare and pet hospitality.

Protect current leadership

Marine and co-sleeping/oversized beds remain MildMate proof markets.

Avoid false scale

Parent-market values are trend signals, not direct custom-bedding revenue forecasts.

Recommended sequence

Marine - RV - Adjustable - Pet - Glamping - Premium Homecare

Management interpretation

- Scale markets where the fit problem is severe and customers have already invested heavily in the bed, vehicle, vessel or property.
- Build B2B channels where saved patterns can generate multi-unit and replacement orders.
- Use a digital pattern library so every successful custom order becomes a reusable commercial asset.

MildMate’s moat is the system - not fabric alone

Marine sheet Irregular geometry, tight cabins and high-value owners.	Co-sleeping sheet Oversized width, joined mattresses and seam-free comfort.
Truck sleeper cab Model-specific fit in a compact mobile environment.	Pet-friendly sheet Hair, dirt, accidents and frequent washing.

The repeatable value chain

1. Measure Dimensions and shape	2. Engineer Pattern and tolerances	3. Configure Fabric and TPU
4. Produce Made to order	5. Store Pattern ID	6. Reorder Same fit, anytime

Capabilities that travel across markets

- ▣ Non-standard geometry and custom pocket depth.
- ▣ 360-degree elastic and secure fitting systems.
- ▣ TPU waterproof protection with a softer, quieter comfort surface.
- ▣ Multiple fabric platforms for heat, softness, durability and care requirements.
- ▣ Low-volume customization, international DTC and trade reordering.

Strategic implication: every new vertical should reuse the same engineering, production and reordering platform.

How to interpret the market numbers

Custom bedding is rarely measured as a standalone category. This report uses parent-market proxies, installed-base signals and trend data, then applies a MildMate-specific fit score.

TAM
Broad parent-market demand

Useful for scale context - not directly addressable revenue.

SAM
Customers with a real non-standard bedding need

Estimate bottom-up using beds, vehicles, vessels, replacement cycles and reachable geographies.

SOM
The share MildMate can realistically win

Requires pricing, conversion, production capacity and channel-cost data.

MildMate opportunity score

Technical fit	30%
Purchasing power	20%
Repeat and B2B potential	20%
Growth momentum	15%
Ease of entry	15%

IMPORTANT READING RULE

Do not add parent-market values together. A USD 112B truck-cabin market does not mean a USD 112B bedding opportunity. Installed base, non-standard geometry and replacement frequency are often more useful than the parent market value.

Where MildMate should invest first

Bubble size indicates relative purchasing-power and average-order-value potential - not market revenue.

Top-right markets combine strong strategic attractiveness with accessible channels. Upper-left markets may be attractive but require specialist B2B partners.

Parent-market signals and MildMate opportunity - Part 1

Figures are directional proxies and should not be added together.

Segment	Market signal	Trend	MildMate opportunity	Pri.
Marine and recreational boats	USD 14.3B yacht proxy; refit USD 2.9B	Yacht growth 7.0%; refit 8.0%	Strongest technical fit; move from owner orders to full-vessel and refit programmes	A+
RV, campervan and motorhome	8.1M U.S. RV-owning households	Large installed base; first-time owners 36%	Short queens, bunks, radius corners and conversions mirror marine problems	A+
Adjustable and split beds	USD 4.44B in 2025	5.56% CAGR to 2031	Persistent sheet movement; premium buyer already invested in bed system	A
Premium pet-owner bedding	USD 158B U.S. pet spend; 95M households	Resilient, but increasingly value-conscious	Waterproof protection, hair resistance and washable layers have clear value	A
Glamping and unique stays	USD 3.8B in 2025	9.5% CAGR to 2033	Unusual spaces, premium guests and multi-unit reorders	A
Premium homecare and senior living	Adjustable-bed and care-mattress proxies	Aging and homecare support demand	TPU, custom depth and articulated beds; enter with cautious claims	A-
Co-sleeping and oversized beds	USD 38.2B bed-linen proxy	5.6% CAGR to 2032	Proven MildMate demand; joined beds and very wide sheets remain underserved	A

Priority guide: A/A+ = scale or build now; B = selective or partner-led; C = supporting category.

Parent-market signals and MildMate opportunity - Part 2

Figures are directional proxies and should not be added together.

Segment	Market signal	Trend	MildMate opportunity	Pri.
Truck sleeper cabs	USD 112.05B broad truck-cabin proxy	3.5% CAGR	Real fit issue, but more price-sensitive and narrower than RV	B+
Luxury hotels and villas	USD 110.9B in 2025	7.5% CAGR to 2033	Pursue only unusual suites, deep beds, round beds and custom properties	B
Pet hotels and veterinary care	Part of wider pet services market	Repeat wash and replacement need	Custom kennel pads and TPU covers create repeatable B2B orders	A-
Private aircraft	8,500 jets / USD 283B over decade	Demand expected to remain strong	High purchase power, but material documentation and access barriers	B-
Wellness and treatment beds	No clean custom-bedding measure	Wellness demand growing broadly	Good waterproof need; lower average order value	C+
Dorm and standard student bedding	Mostly standard Twin XL demand	Seasonal and price-sensitive	Useful for duvet covers, but weak engineering differentiation	C
Round, antique and unusual home beds	No standalone market size	Evergreen long-tail search demand	Strong margins but fragmented; group under hard-to-fit home beds	B

Priority guide: A/A+ = scale or build now; B = selective or partner-led; C = supporting category.

Directional market-priority scorecard

The score ranks business fit for MildMate. It is not a market-size forecast.

Priority decisions - Part 1

#	Segment	Score	Recommendation	Why MildMate can win
1	Marine & yacht	97	Scale + premium B2B	Proven fit problem; affluent ownership; repeat vessel sets
2	Glamping & unique stays	90	Build B2B	Fast growth; unusual geometry; multi-unit reorder potential
3	RV & campervan	86	Scale now	Same engineering problem as marine; large owner base
4	Adjustable & split beds	86	Scale now	Sheet movement is a costly, persistent pain point
5	Premium homecare	84	Staged entry	TPU plus adjustable fit; recurring wash and replacement need
6	Premium pet-owner bedding	83	Scale now	Large resilient spend; waterproof protection has clear value
7	Co-sleeping & oversized	82	Defend leadership	Already proven; mass brands struggle with width and seams

Priority decisions - Part 2

#	Segment	Score	Recommendation	Why MildMate can win
8	Luxury hospitality - unusual beds	79	Selective B2B	High budgets, but only custom suites preserve differentiation
9	Pet hospitality & veterinary	77	Build B2B	High wash cycles and repeat replacement orders
10	Private aviation	77	Partner pilot	Very high purchasing power; certification and access friction
11	Truck sleeper cabs	75	Targeted growth	Real fit problem; narrower and more price-sensitive buyer pool
12	Wellness & treatment beds	70	Secondary	Good waterproof need, lower average order value
13	Standard dorm bedding	49	Supporting only	Mostly standardized dimensions and price-sensitive buyers

MANAGEMENT INTERPRETATION

90+ defend or build immediately. 80-89 scale systematically. 70-79 enter selectively or through partners. Below 70 remains a supporting category.

Marine and yacht: defend the beachhead, move upstream

USD 14.3B 2025 global yacht-market proxy [2]	USD 2.9B 2025 yacht maintenance and refit [3]	8.0% Refit forecast CAGR to 2035 [3]
--	---	--

Growth thesis

Marine is more than a custom-sheet category. It can become a recurring full-vessel textile programme.

- Expand from individual owners to refit yards, yacht interior designers, charter managers and boatbuilders.
- Package fitted sheets, quiet TPU protectors, duvet covers and pillowcases by cabin.
- Store every cabin pattern under a vessel ID so replacement sets require no remeasurement.
- Use “Measure once. Reorder the same fit anytime.” as the B2B promise.

Examples of geometry that standard bedding cannot solve well

V-berth

Cut corner

Rounded nose

Split set

Recommended offer ladder

FIT Custom fitted sheet	PROTECT Sheet plus TPU protector	CABIN SET Add duvet cover and pillowcases	FULL VESSEL All cabins plus spare sets
-----------------------------------	--	---	--

Sources: [2] Global Market Insights; [3] Future Market Insights. Figures are parent-market signals, not custom-bedding TAM.

Build a premium refit and charter programme

Target partner groups

- Yacht interior designers and marine upholstery studios.
- Refit yards, boat mattress manufacturers and marine dealers.
- Charter managers that need labeled spare sets and fast replacement.
- Boatbuilders seeking low-volume bedding for model-specific cabins.

Trade operating model

1. SAMPLE Fabric and TPU swatch kit	2. MEASURE Cabin map and pattern ID	3. PACKAGE Fit, Protect or Full Vessel	4. REORDER Vessel ID and cabin label
---	---	--	--

WHY THIS CAN COMPOUND

A vessel may contain several unique mattresses. Once MildMate stores the patterns, future replacement orders become easier, faster and less price-sensitive than the first custom order.

Recommended B2B message: Full-vessel bedding engineered by cabin, stored by vessel, and ready to reorder.

RV and campervan: the strongest immediate adjacency to marine

8.1M U.S. RV-owning households [4]	49 Median RV-owner age [4]	36% First-time RV owners [4]
---------------------------------------	-------------------------------	---------------------------------

Why the market fits

- ❑ Short queens, radius corners, bunks, sofa beds and van-conversion mattresses create genuine fit problems.
- ❑ Owners already spend on vehicle comfort and use the vehicle repeatedly, improving willingness to pay.
- ❑ Model-and-year catalogue pages can convert past custom jobs into searchable, repeatable products.
- ❑ The natural bundle is a fitted sheet, quiet TPU protector and 3-sided zipper duvet cover.

Recommended product architecture

RV FIT Custom secure fitted sheet	RV PROTECT Add quiet TPU protector	RV SLEEP SET Add zipper duvet and pillows	CONVERTER PACK Multi-bed trade programme
--------------------------------------	---------------------------------------	--	---

Near-term decision: invest more aggressively in RV/campervan than truck sleeper. RV has a broader household owner base and closer DTC economics to marine.

Source: [4] RV Industry Association. Ownership figures are installed-base signals, not custom-bedding TAM.

Truck sleeper cab: targeted growth, not broad mass marketing

USD 112.05B Broad 2025 truck-cabin proxy [9]	3.5% Broad proxy CAGR [9]	Smaller slice Relevant sleeper-bedding demand is far smaller
--	-------------------------------------	--

Best customer targets

- ❑ Owner-operators who invest personally in long-haul comfort.
- ❑ Premium fleets and driver-retention programmes.
- ❑ Sleeper-cab upfitters and truck-mattress manufacturers.
- ❑ Model-specific search buyers who know their truck make, model and berth size.

Commercial guidance

- ❑ Build pages by make/model, berth dimensions and pocket depth.
- ❑ Emphasize secure fit, durability, easy washing and daily comfort - not luxury alone.
- ❑ Expect more price sensitivity than yacht or premium RV customers.
- ❑ Use the market as a focused catalogue opportunity rather than a large generic campaign.

DECISION

Continue the launch, but allocate more expansion budget to RV. Truck sleeper should be model-specific, search-led and partner-supported.

Source: [9] Fortune Business Insights. The quoted value is a broad truck-cabin proxy.

Adjustable and split beds: a persistent premium fit problem

USD 4.44B 2025 adjustable-bed-base market [5]	USD 6.14B Forecast market by 2031 [5]	5.56% Forecast CAGR, 2026-2031 [5]
---	---	--

Why the need persists

When an adjustable bed articulates, standard sheets can pull loose, bunch or expose the mattress. The customer has already invested in an expensive sleep system and will pay to make it work properly.

- Split King and split-head configurations.
- Independent twin adjustable beds used as one shared sleep system.
- Extra-deep or bariatric mattresses.
- Waterproof protection for homecare and senior living.
- BedBridge and gap-management combinations.

Entry ladder

1. DTC Adjustable-bed owners	2. TRADE Mattress and bed retailers	3. CARE Private homecare and senior living	4. INSTITUTIONAL Only after compliance review
--	---	--	---

Source: [5] Mordor Intelligence. Avoid safety, medical or infection-control claims until testing supports them.

Premium homecare and senior living: staged entry

Best entry point

Begin with private homecare, premium senior living and adjustable care beds - not large public-hospital tenders. The private customer values a comfortable, non-clinical look while still needing frequent washing and waterproof protection.

Customer needs

- ▣ Quiet waterproof TPU protection.
- ▣ Secure fit on articulating beds.
- ▣ Split-bed and extra-wide configurations.
- ▣ Easy removal and frequent washing.
- ▣ Comfort fabrics that do not look institutional.

Entry risks

- ▣ Medical and antimicrobial claims require evidence.
- ▣ Institutional procurement is slow and documentation-heavy.
- ▣ Finished-product testing may differ by jurisdiction.
- ▣ Caregivers need simple ordering and clear laundering guidance.

Recommended position: custom care bedding for comfort, fit and practical protection - without unsupported clinical claims.

Premium pet-owner bedding: protect the human bed

USD 158B U.S. pet expenditure in 2025 [6]	95M Pet-owning U.S. households [6]	71M Dog-owning U.S. households [6]
---	--	--

Consumer proposition

Protect the owner’s mattress while preserving bedroom aesthetics and softness.

- ▣ Pet-friendly fitted sheets and washable replacement layers.
- ▣ Target affluent dog owners, large breeds, senior pets and multi-pet homes.
- ▣ Solve hair, drool, mud, accidents and frequent washing.
- ▣ Use emotional comfort plus practical mattress-protection messaging.

Layered protection system

MARKET NUANCE

Pet spending is resilient, but buyers are increasingly value-conscious. MildMate must prove durability, washability and mattress-protection savings - not rely on novelty.

Source: [6] American Pet Products Association, 2026 State of the Industry reporting 2025 results.

Pet hospitality and veterinary: a separate B2B offer

Commercial opportunity

Commercial pet-care customers value repeatability, sanitation workflow and replacement speed more than decorative styling. High wash cycles can create recurring orders.

- ▣ Custom kennel pads, cage mattresses and recovery-bed covers.
- ▣ Replaceable TPU covers and washable comfort-top layers.
- ▣ Pattern IDs for standardized kennel or room reorders.
- ▣ Targets: pet hotels, boarding kennels, groomers, breeders and private veterinary clinics.
- ▣ Create commercial laundering guidance, room labels and multi-unit pricing.

Recommended offer

PAD FIT Custom shape and depth	WATERPROOF TPU barrier cover	REPLACEMENT TOP Washable comfort surface	FACILITY PACK Labeled multi-unit order
--	--	--	--

Do not mix consumer pet-owner messaging with veterinary or kennel messaging. They have different buyers, proof points and reorder patterns.

Glamping and unusual stays: high-growth B2B

USD 3.8B 2025 glamping market [7]	9.5% Forecast CAGR to 2033 [7]	USD 110.9B 2025 luxury-hotel proxy [8]
---	--	--

Why glamping fits MildMate

Operators sell a premium sleep experience inside structures that often force unusual mattress shapes and dimensions.

- Geodesic domes, safari tents, pods, tiny houses, treehouses and floating villas.
- Multi-unit properties can generate repeatable room or pod packages.
- Commercial buyers value spare sets, room labels and rapid replacement.
- A fabric sample kit and trade pricing can shorten B2B sales cycles.

Trade package

SITE MAP Room or pod measurement IDs	SLEEP SET Sheet, protector, duvet, pillows	SPARES Labeled replacement inventory	REORDER Property ID and room label
---	---	---	---

Sources: [7] Grand View Research, Glamping; [8] Grand View Research, Luxury Hotels. Figures are not directly additive.

Luxury hospitality: pursue only beds that preserve differentiation

SELECTIVE HOSPITALITY RULE

Do not compete for standard hotel linen. Target properties where architecture, mattress depth, shape or guest positioning makes custom fit essential.

Best targets

- ▣ Round beds, antique frames, extra-deep mattresses and joined beds.
- ▣ Boutique villas, heritage properties and themed suites.
- ▣ Floating accommodation, converted vehicles, luxury pods and custom daybeds.
- ▣ Properties that need room labels, spare sets and reliable replacement.

Why this can work

- ▣ The property has high guest-experience stakes and cannot buy the correct fit off the shelf.
- ▣ B2B orders can include several textiles per room and repeated replacement cycles.
- ▣ MildMate can compete on engineered fit and operational convenience rather than standard-linen price.

Recommended message: custom bedding systems for signature rooms and spaces that standard hospitality suppliers cannot fit.

Co-sleeping, joined mattresses and oversized family beds

USD 38.2B 2025 global bed-linen proxy [10]	5.6% Forecast CAGR to 2032 [10]	Proven Existing MildMate product-market evidence
--	---	--

Two mattresses. One smooth sleep surface.

One oversized fitted surface with 360-degree elastic

Strategic role

Co-sleeping and oversized beds remain a high-fit niche where mass brands struggle with width, seams, pocket depth and joined mattresses.

- ▣ Create region-specific joined-size options and clear dimension graphics.
- ▣ Bundle BedBridge, one-piece fitted sheet and waterproof protection.
- ▣ Expand SEO around family bed, oversized sheet, two mattresses together and Alaskan King.
- ▣ Use saved dimensions to drive replacement and seasonal-fabric reorders.

Marketing boundary: position for adults and families with older children. Do not imply that an oversized sheet makes infant bed-sharing safe; CDC guidance says room sharing is safer than bed sharing for infants. [13]

Sources: [10] Persistence Market Research; [13] U.S. CDC. No reliable standalone market size for co-sleeping sheets was located.

High-value alternatives that require selective entry

Market	Purchase power	Entry friction	Route	Signal
Private aviation	Very high	Very high	Partner pilot	8,500 jets valued at USD 283B over 10 years [11]
Expedition vehicles	High	Medium	Partner pilot	Custom interiors and geometry similar to RV
Luxury sleeper rail	High	High	Selective B2B	Fleet sets, cabin labels and fire requirements
Offshore crew lodging	Medium	High	Selective B2B	Durable, washable, space-specific bedding
Wellness treatment beds	Medium	Low	Secondary	Waterproof fit, lower average order value
Standard dorm bedding	Low	Low	Supporting	Seasonal, but dimensions are usually standardized

RULE FOR FRONTIER MARKETS

Enter only through a specialist partner who can handle access, specifications, approvals and recurring account relationships. Do not build broad consumer marketing first.

Source: [11] Honeywell Global Business Aviation Outlook. Other frontier segments are strategic hypotheses requiring primary interviews and bottom-up sizing.

One operating platform, three market families

MOBILE LIVING	FLEXIBLE CARE	OVERSIZED AND UNIQUE
☐ Marine and yacht ☐ RV and campervan ☐ Truck sleeper ☐ Expedition vehicle ☐ Private aviation	☐ Adjustable beds ☐ Premium homecare ☐ Senior living ☐ Pet protection ☐ Veterinary and boarding	☐ Co-sleeping ☐ Joined mattresses ☐ Glamping ☐ Boutique hospitality ☐ Round and antique beds

Shared core capabilities

- ☐ Measurement system and engineering tolerance rules.
- ☐ Pattern library linked to customer, model, vessel, room or bed ID.
- ☐ Fabric platforms and TPU waterproof options.
- ☐ Made-to-order production and low minimum order quantities.
- ☐ Trade samples, quoting, labels and repeat-order workflow.

The source of scale is reusable engineering data - not becoming a mass-market linen brand.

Turn custom work into clear, repeatable offers

Universal offer ladder

FIT Custom fitted sheet	PROTECT Add quiet TPU protection	COMPLETE Add duvet cover and pillowcases	TRADE Multi-unit labels and stored patterns
-----------------------------------	--	--	---

Model-specific catalogue

- Move beyond a blank custom-measurement form by publishing recurring patterns by boat, RV, truck or bed type.
- Create searchable pages such as Sprinter campervan sheet, Volvo VNL sleeper sheet, Sea Ray V-berth sheet and split-head King sheet.
- Keep custom ordering available for unknown shapes, but reduce friction when a proven pattern already exists.
- Every new successful pattern should be assessed as a possible product page, marketplace listing or trade SKU.

Digital pattern library

- Customer or account ID, vehicle/vessel/property model, mattress ID and shape.
- Length, width, depth, corner/radius data, fabric, TPU option and production pattern version.
- Photos, measurement confirmation, previous order and reorder eligibility.
- A customer-facing promise: measure once, reorder the same fit anytime.

A staged 36-month market-entry plan

0-6 MONTHS	6-18 MONTHS	18-36 MONTHS
- Deepen marine and co-sleep SEO. - Launch model-specific RV and truck pages. - Formalize premium pet-owner bundle. - Create the pattern-ID database. - Build fabric and TPU sample kits.	- Launch adjustable-bed range. - Create yacht-refit trade programme. - Pilot glamping operators. - Pilot pet hotels and private clinics. - Add a trade reorder portal.	- Scale premium homecare. - Expand property and fleet accounts. - Test aviation and rail partners. - Regionalize EU and U.S. catalogues. - Use pattern data for SKU expansion.

SEQUENCING PRINCIPLE

First strengthen the DTC categories closest to current capabilities. Then build B2B channels around stored patterns and multi-unit reorders. Enter regulated or high-friction markets only after the operating platform is mature.

Core KPIs for niche-market expansion

KPI	Definition	Why it matters
Pattern reuse rate	Percentage of orders produced from a saved pattern rather than a new custom engineering job.	Shows whether engineering data is becoming a scalable asset.
AOV by vertical	Average order value, bundle mix and fabric/TPU mix by segment.	Identifies high-value categories and bundle opportunities.
Quote-to-order conversion	Conversion from custom enquiry or configuration to paid order.	Reveals friction in measurement, quoting and trust.
Repeat reorder rate	12-month and 24-month reorder by customer, vessel, property or model.	Measures the value of stored patterns and replacement cycles.
B2B account value	Annual revenue, number of beds and reorder frequency per partner.	Separates one-time pilots from scalable commercial accounts.
Engineering hours per order	Design and checking time for new versus reused patterns.	Protects margin and quantifies operational leverage.
Gross margin by vertical	Margin after fabric, engineering, production, shipping and marketplace fees.	Prevents attractive parent markets from hiding poor economics.

The most important leading indicator is pattern reuse. It connects engineering effort, catalogue expansion, reorder speed and gross margin.

Where positioning and claims require discipline

Medical and care claims	Do not claim antimicrobial, infection-control, pressure-relief or medical outcomes without appropriate finished-product evidence.
Infant co-sleeping	Do not imply that an oversized sheet makes infant bed-sharing safe. Use CDC-aligned boundaries. [13]
Aviation and rail	Fire-retardancy, documentation and approval requirements may apply. Enter through qualified partners.
Parent-market figures	Use as context and trend signals only. Do not present them as MildMate custom-bedding TAM.
Measurement error	Use clear measurement guides, photo confirmation, tolerance rules and customer approval before production.
Overexpansion	Do not launch too many unrelated verticals before the pattern library, quoting and reorder workflow are stable.

GOVERNANCE PRINCIPLE

MildMate can market fit, comfort, waterproof protection, material composition and practical use when supported. Regulated performance and safety claims require a separate evidence and compliance process.

Become the default brand for beds standard bedding cannot fit

Recommended growth sequence

1. MARINE Defend and move into premium B2B	2. RV Scale DTC and convert channels	3. ADJUSTABLE Launch a focused product range	4. PET Separate consumer and B2B offers
5. GLAMPING Build multi-unit trade accounts	6. HOMECARE Stage channels and claims	7. TRUCK Grow through model-specific search	8. FRONTIER Enter only through specialists

Five actions to start now

- ▣ Define one master data model for shape, dimensions, pocket depth, fabric, TPU option and pattern ID.
- ▣ Turn repeated custom jobs into model-specific product and SEO pages.
- ▣ Create FIT, PROTECT, COMPLETE and TRADE bundles across priority verticals.
- ▣ Launch a trade programme with samples, pricing, labels and stored-pattern reorders.
- ▣ Track conversion, AOV, gross margin, engineering time and repeat rate separately by vertical.

BOTTOM LINE

MildMate should expand through adjacent fit problems, not generic bedding categories. The engineering and pattern database should become the company’s compounding strategic asset.

Next BI phase: build bottom-up TAM-SAM-SOM models for Marine, RV, Adjustable, Pet, Glamping and Premium Homecare using installed beds, non-standard geometry share, replacement frequency, MildMate AOV, reachable geography and channel cost.
